

ICAO Dangerous Goods Instructions

Technical Instructions for the Safe Transport of Dangerous Goods by Air

Many shippers, forwarders and carriers involved in the transport of dangerous goods by air are not aware that the “regulations” they use are based on an underlying framework set out under Convention by ICAO (The International Civil Aviation Organization).

The ICAO Dangerous Goods Technical Instructions represent the official legislative provisions for the transport of dangerous goods by air for all member states globally (and the airlines registered within those states).

ICAO publish a revised version of the Technical Instructions every two years, based on their knowledge of the pace of change in the type and nature of dangerous goods materials being transported by air.

Why buy any other publication when the official source providing the facts and legislation on the transportation of dangerous goods by air provides everything you need to know in one book.

Available in English, French, Russian and Spanish.

Features:

- The official regulations on the transport of dangerous goods and hazardous materials by air
- Published every two years based on regular involvement by ICAO in key decision-making authorities (e.g. the U.N. Sub-committee of Experts on the Transport of Dangerous Goods and the International Atomic Energy Authority)
- Detailed instructions in a comprehensive and easy-to-use format covering; Identification (U.N. Classification), Packing, Restrictions, Documentation and Handling
